

CAMPBELL CRIMPNOLOGY™ HOSE ASSEMBLY SYSTEM

CampbellCrimpnology* delivers the only comprehensive package of crimping products in the industry

CampbellCrimpnology™ includes fittings, couplings, ferrules, sleeves, crimp specs, testing, and training.

Get with the system!

Ferrules and sleeves provide a neat, simple, attractive hose assembly system for your end-user customer. An assembly system is a powerful tool to attract and keep business, increasing sales and profits.

Crimping features and benefits

- Provides precisely measured, repeatable assemblies
- Allows for higher working pressures than band clamps
- Improves "dragability"... low profile, no sharp edges, reduces weight.
- Ferrules interlock with couplings/fittings, offering the ultimate in hose retention (see diagram below).

crimp-nol' o-gy n.

systematic treatment of the art of hose/fitting attachment

a: the practical application of hose attachment methods

<crimped hose assemblies>

b: a capability given by the practical application of crimping knowledge

<repeatable hose assemblies>

c: a method, process, etc. for handling a specific hose problem

<a tool to increase sales>

Choose CampbellCrimpnology™ for all your air, steam, chemical, petroleum, and specialty hose applications!
