

SPECIALTY CHEMICAL HOSE COUPLINGS

ChemJoint™ Couplings

Unique safety features:

- Hand-tight, leak free coupling with zero evaporatives.
- Crimpnology™ hose ends
- Excellent for heavy viscous media.
- Excellent for line dedication
- Replaces cam and groove couplings in high vibration areas.
- Replaces cam and groove couplings in tight spaces where a hand-tight coupling is preferable to closing two cam handles.
- Replaces flanges, reducing cost and cutting maintenance time.
- Available with weld-on hose ends for metal hose applications

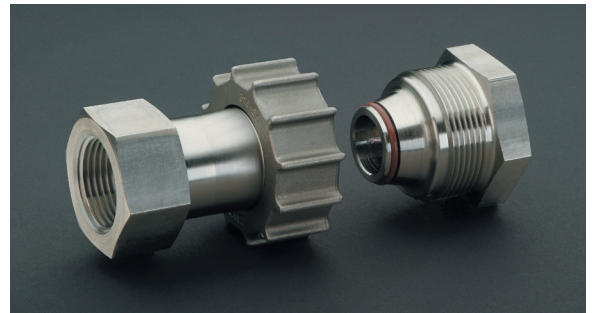

ChemJoint™ Union

Unique safety features:

- Offers flexibility when plumbing hoses in plant.
- Threads onto ChemJoint male stems for hose-to-hose connections.
